

Complete replacement of a marina on the exclusive River Thames

DB Marine, Cookham

In July 2024, Walcon completed an installation for DB Marine, a company located in Cookham on the River Thames that supports boat owners with a range of services.

The project involved the removal of the existing pontoons and replacing them with a larger facility. The new marina is made up of four piers totalling 112 metres and 26 finger pontoons, all built using Walcon's System 2000 product with timber decking. Riverworks Ltd was responsible for the piling.

Dan Barber, managing director of DB Marine, said: "Walcon were attentive and professional from the outset. Having seen the quality and durability of the product in other marina locations, I was impressed by their consultative approach."

"They certainly demonstrated patience when confronted by design location challenges and implementation delays beyond our control.

"I was particularly impressed by their agility supporting our project from an operational perspective with numerous deliveries being brought forward to meet our more aggressive installation demand.

"Our customer base have already been very complimentary about the high quality of the product which is clearly important to align with our own high standards and reputation. Thank you to the Walcon team!

Founded in 1963, Walcon Marine is the market leader in the design, construction and installation of marinas, yacht harbours and berthing facilities around the world. As probably the longest established and most experienced company in its field, Walcon Marine is a global organisation with manufacturing facilities in the UK, Australia and Dubai. Its pontoons are now installed in over 30 different countries on five continents.
